(FOR ADDRESS ONLY.)

**Lizard Canaries.** The plumage of these birds is quite distinct from any of the other varieties of Canaries. They are much smaller than the Norwich variety, but are neat and well proportioned. The Lizard Canary is not a very popular variety, the number of breeders being decidedly small. The aim of the breeder is to get the cap, viz., the clear coloured feathers on the top of the head, pure and true in shape, and the inarking on the other feathers as distinct and sharp as possible. There are two varieties: the Gold Spangled and the Silver Spangled.

Printed in England.
